RIOT CONTROL SHIELD

It provides protection with 36 people with its shields and weapons. It has shooting ports especially designed to use for the shootings, which are not mortal directly. It can be used as a gate for the transfer of quick response forces with the lifting feature up to 3 meters. During the drive, it can absorb impacts on harsh fields and it can be put on the place without any person to serve as barrier. It has a guarded elevation platform and can be equipped with a ballistic guard.

RIOT CONTROL SHIELD

KATMERCİLER
ARAÇ ÜSTÜ EKİPMAN SANAYİ VE TİCARET A.Ş.

- The vehicle and shield is equipped with speakers in order to give instruction to the security forces and call for the demonstrators by the chief operator.
- There is a lightning system on the upper part of the system, being guarded and high-level resistant in order to utilize in dark.

RIOT CONTROL SHIELD

- The integrated-guarded and wide-angled cameras provide visions with the operator about the situation in front of the shield.
- The system can be equipped with smoke ammunitions, GSM band jammer in order to block the local mobile communication, a guarded matrix screen and other additional accessories.

- There is a more complex and modular videos system versions in order to monitor and follow up the situation (one central, one periscope and two side cameras, and stereo microphones) High pressured tar gas weapons guarantee mass control in case of extreme conditions and close response against the demonstrators.
